Cottonwood and sycamore are common along the streams and beech are the principal tree species. Approximately 60 percent of the area is open land, consisting of crop fields intermixed with fields of broomsedge and scattered symbols. The remainder is divided equally between woods and brush. Pin oak, hickory, soft maple, sassafras, soft maple, pin oak, and gum. The terrain is very flat, except for the narrow valleys of Indian Creek. This 1,799-acre wildlife area is one mile east of Fayetteville in northern Brown County. County and township roads provide good access to the area from U.S. Routes 50 and 68.

Aerial Photography was flown in the Spring of 2012 as part of the OSIP II Ohio Statewide Imagery Program.
