

Joe Merritt's education includes degrees in Elementary Education and Business Administration. He began his career in GIS in the mid-'80's, before GIS was an acronym that anyone would recognize.

His work over the years has included consulting for Federal, State, County, and City Governments, and he has been employed by four major GIS Consulting firms. His titles have included Support Analyst, Trainer, Department Manager, Regional Manager, I.T. Specialist, and Miracle Worker.

Mr. Merritt spent the better part of a decade working in Indianapolis Indiana and Columbus Ohio before taking the job of GIS Manager for Clinton County Ohio, where he has served for 16 years and continues working to this day.

Throughout the last decade and a half Mr. Merritt has assisted neighboring counties and municipalities with GIS work, alongside IT implementations, and considers it an honor to help when and where he can.
